EDUCATION

Udemy.com August 2026 - Current

Complete React Developer (Zero-to-Mastery)

Completed comprehensive coursework covering enterprise React concepts, custom hooks, dynamic client-side routing, and state management paradigms. Practiced application architecture, third-party API integration, and performance optimization techniques.

MT Coding Tech April 2026 - September 2026

React Js Class

Focused on building production-ready web applications using React, Next.js (App Router), TypeScript, and Tailwind CSS. Mastered global state management (Zustand) and server-state caching using TanStack Query. Built performance-optimized, responsive UI components with Framer Motion animations and Material UI integration.

MT Coding Tech Oct 2023 - March 2024

Web Design Basic

Mastered foundational web technologies including semantic HTML5, CSS3 layout systems (Flexbox and CSS Grid), and modern ES6+ JavaScript. Built responsive, mobile-first website layouts focusing on clean component architecture, cross-browser compatibility, and web accessibility standards.
